Education

Indian Institute of Information Technology, Nagpur

Nov 2022 – July 2026

B.Tech in Computer Science and Engineering (AIML)

Nagpur, Maharashtra

- **Coursework:** Machine Learning, Deep Learning, NLP, Computer Vision, DBMS, DSA, Statistics, Data Mining, Cloud Computing, AI, Data Science.

Experience

InUnity

Jan 2026 – Present

Assistant Program Mentor

India

- Undergoing skill development across FlutterFlow, UI/UX (Figma), Arduino, 3D Printing, and Onshape.
- Learning to translate real-world societal problems into feasible technical project ideas and prototypes.
- Gaining hands-on exposure to UI/UX design using Figma and application workflows using FlutterFlow.
- Applying design thinking principles to analyze problem statements and develop solution approaches.
- Working closely with senior mentors to understand project evaluation criteria and mentoring workflows.

Tantrafiesta – IIITN Technical Fest

Aug 2024 – Oct 2024

Senior Coordinator – Content & Marketing

IIIT Nagpur

- Managed content creation and anchoring while ensuring consistent communication across technical events.
- Worked closely with marketing and PR teams to support promotions, outreach, and event execution.

Projects

Tuberculosis Detection 🌐 GitHub | *Python, TensorFlow, Keras, OpenCV*

- Built DenseNet and Vision Transformer models for TB detection from X-ray images using Grad-CAM explainability.
- Achieved 99% (DenseNet) and 98% (ViT) accuracy; deployed the model with a Gradio-based interface.

Semantic Segmentation of Aircraft 🌐 GitHub | *TensorFlow, Keras, OpenCV*

- Implemented U-Net model for aircraft segmentation using XML annotations and aerial image datasets.
- Used data augmentation and patch-based training for precise aircraft boundary segmentation.

Predictive Maintenance using RL 🌐 GitHub | *Python, OpenAI Gym, TensorFlow*

- Developed a custom OpenAI Gym environment to simulate machine failures and optimize maintenance schedules.
- Trained a DQN agent that reduced downtime through predictive maintenance planning.

Skills

- **Languages:** Python, C/C++, JavaScript, SQL
- **Frameworks/Libraries:** TensorFlow, Keras, PyTorch, OpenCV, Scikit-learn, pandas, NumPy, Matplotlib
- **ML/AI:** CNN, Transformers, NLP, LSTM, Attention, Transfer Learning, Reinforcement Learning
- **Tools/Platforms:** Git, Docker, Power BI, Tableau, Google Colab, MongoDB, MySQL, OpenAI Gym

Certifications & Trainings

- NVIDIA DLI – Fundamentals of Deep Learning (2024)
- NVIDIA DLI – Building Transformer-Based NLP Applications (2024)

Awards & Achievements

- Winner – National-level Business Case Study Competition “Optimized Odyssey” at E-Summit, IIIT Nagpur
